**Scope:** International Symposium on Green Transformation Initiative and Innovative Zero-Carbon Energy Systems, GXI-ZES, aims at discussing the latest research activities relevant to the development of green transformation technology and innovative zero-carbon energy systems, which shall be the technologies to supply energy for a carbon-neutral society, including zero-carbon energy, energy carrier, climate change mitigation, carbon neutral and innovative nuclear energy technologies within a broad perspective. The goal is to visualize and share a new stage of the green

transformation technologies and zero-carbon energy system technologies for a carbon-neutral society. The symposium is planning the special collaboration sessions organized with MIT, EPRI and DLR.

**Topics:**

1. Green Transformation and Zero-Carbon Energy System Technologies
2. Innovative nuclear energy technologies
3. Energy storage and transformation technologies
4. Energy carriers
5. Material recycling technologies for energy systems
6. Innovative nuclear applications
7. Energy Policy and Economics

**Call for Paper:** Participants who wish to present at the conference are invited to submit an abstract in English.
